

Test 5.1: Create Your Own Django Project Idea

Task: Create a Django project idea and pitch it. You will present your idea in class for discussion.

Instructions:

1. Project Idea Proposal

- Develop a unique idea for a Django web application project.
- Write a brief proposal outlining the following details:
 - **Project Title:** Give your project a title.
 - **Project Description:** Describe the purpose and features of your Django application.
 - **Target Audience:** Specify who will use your application.
 - **Key Functionality:** Highlight the main features and functionalities your application will include.
 - **Expected Outcome:** What do you aim to achieve with this project?

2. Pitch Preparation

- Prepare a short presentation (3-5 minutes) to pitch your project idea.
- Use slides or any visual aids to support your pitch (optional but recommended).

3. Presentation Guidelines

- During your presentation, cover the key points from your proposal.
- Be prepared to answer questions from the instructor and classmates.
- Focus on clarity, creativity, and feasibility of your project idea.

Grading:

- Your proposal and pitch will be graded based on creativity, clarity of presentation, feasibility of the project idea, and potential impact.

Submission:

- Submit your project proposal (written document) before the presentation day.
- Submit your completed PDF document containing screenshots in Whatsapp Group.

Note: This test encourages you to think creatively and apply your Django knowledge to propose a practical and innovative web application idea.
